Hi, Allen.

I was just talking to Steve Way about the 2013-2014 Red and Bonita mine investigation and packer test report. It would be nice to include your packer test results in the report. I have the Excel table that Eric sent to you and the preliminary findings you sent in September, but if you have calculated conductivities or have done any other analysis it would be good to add. Also I have a limited amount of information from the 2013 mine mapping and assessment (not sure if you were in on that one or not). If you have something written up about either of those, could you send it?

Thanks

Jan
